

## Lecture Abstract

---

### **Dr. Marco Degidi, Bologna/IT**

Bologna, Italy;  
Private practice

#### **Main implantological topics:**

- Immediate loading
- Tissue preservation

#### **Professional skills:**

- Oral surgery
- Implant prosthodontic

### **Prof. Dr. Adriano Piattelli, Chieti/IT**

Dental School, University of Chieti-Pescara, Chieti, Italy

#### **Main implantological topics:**

- Peri-implant soft and hard tissue
- Lack of peri-implant bone resorption

#### **Professional skills:**

- Basic bone research
- Implant research
- Oral pathology and medicine

### **Success factor treatment protocol: Less is more!**

When selecting the appropriate treatment plan, crucial goals have to be considered for the good of the patient: Minimized crestal bone loss, reduced treatment time and cost, and if appropriate, reduced need for augmentation. Together with the speakers, you will explore the Bologna Concept of immediate implant placement with immediate restoration, learn the histological evidence and the scientific basis for their conclusions.
