

Lecture Abstract

Dr. Alan E. Fetner, Jacksonville, Florida/US

University of Florida, College of Dentistry;
Periodontist

Main implantological topics:

- Anterior implant positioning

Professional skills:

- Private practice periodontist. Faculty University of Florida College of Dentistry, Periodontics

The single tooth anterior ANKYLOS® implant... Optimizing implant position"

The unique features of the ANKYLOS® design are utilized to optimize soft tissue health and esthetics. This session will show that by utilizing variability in implant depth, abutments can be positioned to allow ideal emergence profiles and ideal soft tissue position. Surgical and temporization methods will be shown to maximize outcomes.
