

Lecture Abstract

Dr. Fernando Luengo Cantó, Madrid/ES

Private Clinic, Madrid, Spain;
Oral Surgeon, Periodontist

Main implantological topics:

- Immediate loading/restoration
- Soft tissue management
- Surgical techniques

Professional skills:

- Surgical techniques
- Soft tissue management
- Platform switching
- Specialized private practice for periodontics, oral surgery and implantology (CIMPLA, Madrid)
- Medical specialist in oral surgery and estomatology

Immediate implants with immediate loading in the front area. A technique for improved esthetics.

It's possible to insert an implant immediately after tooth extraction and to endow it with functional and esthetical prosthesis within one surgical procedure.

The lecture shows some examples and the technique how to do it.
